## Description

Whether it's the corporate boardroom or the preschool playground, today's world has become a competitive, cutthroat place. Help give your little one the philosophical leg up with **Machiavelli for Babies**. Teach them how to acquire and wield great power, and ruthlessly bring destruction upon their rivals. The book features time-tested classic advice from history's most clever and scheming political advisor **Niccolò Machiavelli**, author of **The Prince**, accompanied by hilarious photos of babies accomplishing insane feats of inspiration and wonder. Prepare your little prince or princess to claim and defend the power that is rightfully theirs, with wisdom such as...

- "He who wishes to be obeyed must know how to command."
- "It is double pleasure to deceive the deceiver."
- "Politics have no relation to morals."
- "It is better to be feared than loved, if you cannot be both."
